Oncology Medical Home: Where it Has Been & Where It Is Going

Bo Gamble
Community Oncology Alliance
“Know from whence you came. If you know whence you came, there are absolutely no limitations to where you can go.”

- James Baldwin 1924-1987
Background – Improving Cancer Care

• 1922 – Commission on Cancer created by American College of Surgeons

• 1990 – NCQA founded

• 2002 – ASCO Quality Oncology Practice Initiative (QOPI)

• 2003 – Medicare Modernization Act enacted

• 2010 – ASCO QOPI Certification Program

• 2011 – Oncology Medical Home Steering Committee

• 2012 – CMMI Community Medical Home COME HOME grant
Commission on Cancer

• 100 individuals who either are surgeons representing the American College of Surgeons or representatives from the national professional organizations

• Keepers of the National Cancer Database

• 9 programs

• 2013 - Became involved in the OMH
  – This first program developed out of community oncology
National Committee for Quality Assurance (NCQA)

- 1990 - Formed with support from Robert Wood Johnson Foundation
- 1991 - First Managed Care Organization Accreditation
- 1992 - Health Plan Employer and Data Set
- 2001 - First accredited NCQA provider organization
- 2011 - Patient Centered Medical Home
- 2013 - Patient Centered Specialty Practice Recognition
- 2017 - Patient Centered Medical Home – Oncology Medical Home
Medicare Modernization Act - 2003

- Final law - 416 pages
  - “Cancer” mentioned 9 times
    - 5 references to screening
    - 4 references to cancer hospitals
    - 1 reference to patient study – the beginning of ASP+6%

- 2010 - Hospital and Physician Compare

- 2010 - Center for Medicare & Medicaid Innovation (CMMI)

- 2011 - Medicare Shared Savings Program: Accountable Care Organizations; Final Rule

- 2017 - CMMI Oncology Care Model
Quality Oncology Practice Initiative (QOPI)

• 2002 - Pilot measures program

• 2006 - Opened to all teams

• 2010 - 973 registered teams

• 2010 - QOPI Certification Program
  – 287 accredited practices – February 2017
  – 3 practices in Spain accredited – September 2017

• QOPI approved as a CMMS Qualified Clinical Data Registry
CMMI COME HOME - 2012

• Goal: Improve health outcomes, enhance patient care experiences and significantly reduce costs of care by keeping patients out of the emergency department and hospital as much as possible.

• 7 teams / 3 years

• Expanded hours

• Triage system / Pathways

• Right care, right place, right time
Oncology Medical Home

• 2011 - Steering Committee

• 2012 - Implementation Committee

• 2012 - Payment Reform Committee

• 2013 - Information Technology Committee

• 2013 - Accreditation Committee with Commission on Cancer
  – OMH Accreditation manual developed
  – 10 Pilots Accredited – May 2015
OMH COC Accreditation: May 2015 – September 2017
Progress and Lessons Learned

1. Producing and updating standards of care
2. Promoting consistent and validated quality
3. Fostering a sense of pride and accomplishment
4. Stakeholders are beginning to take notice
5. Requires a lot of energy and resources
Transformation of Accreditation Programs

• Demonstrated lower cost of care while maintaining the highest quality

• Integrated quality /value programs with redesigned payment programs – at different levels

• Programs that promote efficiency – throughout the initiative

• Emphasis on health care components that are important to Payers and Employers
  – Timing
  – Accountability
  – Access
  – Value
Transformation of Accreditation Programs

• Progressive, real-time/meaningful benchmarks – not just a target.

• Adaptability by different stakeholders – with some degree of flexibility.

• Continue emphasizing:
  – Communications
  – Evidenced based medicine
  – Measurement/validation
What’s Next?

• Approximately 30 days ago we communicated the following to the Commission on Cancer
  “… Our organizations simply have different priorities relating to an accreditation program… We are now assessing our options on how best to meet the needs of community oncology practices.”

• We are actively involved in collaborative discussions with; NCQA, ASCO, IOBS for a Joint Principals document that emphasizes demonstrated best quality and value in cancer care for patients every where.

• We are unaware of the Commission on Cancer’s plans for their Oncology Medical Home accreditation program.
